If this score is much higher than the infrastructure/adoption score, efforts should be made to focus on digital literacy and exposing residents to the benefits of the technology.

### Infrastructure/Adoption Score
- **28.861** average maximum advertised download speed in Mbps
- **2.963** average maximum advertised upload speed in Mbps
- **40.0 - 59.9%** of households with a 10/1 broadband connection
- **7.7%** of people without access to fixed broadband of at least 25 Mbps down and 3 Mbps up

If this score is much higher than the socioeconomic score, efforts should be made to upgrade the broadband infrastructure.

### Socioeconomic Score
- **12.5%** population ages 65 and older
- **5.7%** ages 25 and older with less than a high school degree
- **19.1%** of individuals in poverty
- **9.4%** noninstitutionalized civilian population with a disability

The digital divide index score (DDI) ranges between 0 and 100, where a lower score indicates a lower divide. The infrastructure adoption score and the socioeconomic score both in a 0 to 100 range as well contribute to the overall DDI. Listed below each score are the indicators used.

### Missed Economic Benefits
- **7,204,317** amount over 15 years if 20% of unserved households had access and subscribed to the service.
